Summary

I am a Web Developer with 7+ years of experience developing applications for the web. My skills run the full range of development activities from requirements gathering through testing and implementation.
I am reliable, flexible, adaptable, fast learner and i have experience working with teams which means i can hit the ground running. I am a self-discipline and i can be left alone to complete tasks quickly, diligently and on time.
For me it will be a pleasure to be part of your work team.

Experience

Web Developer – 09/2018 to 12/2019
Carboy, Tehran
The carboy (http://carboy.ir) is the first application in Tehran that anyone can reserve online services for a car.
I designed, developed, and maintained the back-end using ASP.NET(C#) MVC and SQL.
Contributed to the open-source community by publishing reusable code libraries.

- *Carboy system*: With Carboy's application, you just need to specify the location of your car, type of service, vehicle model, the preferred time and submit your request till the Carboy team reaches your location at the specified time.
